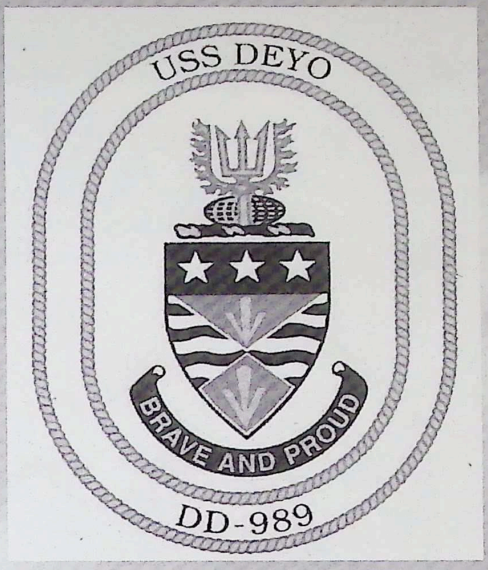
Vice Admiral Morton L. Deyo (1887-1973)

USS DEYO is named in honor of Vice Admiral Morton L. Deyo, U. S. Navy. Admiral Deyo was a veteran destroyerman and distinguished naval gunfire support task force commander of Wrold War II. A graduate of the U. S. Naval Acacdemy, he served with distinction in both the Atlantic and Pacific fleets. In the Atlantic, he commanded the destroyers which provided the first American escort assistance to allied convoys to England just prior to Pearl Harbor. He later proved himself a master of naval gunfire support at Utah Beach in the Normandy invasion as well as during the invasion of Southern France. Admiral Deyo's crowning achievement was command of gunfire and covering force for the assult and occupation of Okinawa. Following the war, he directed the landing of occupational forces in Northern Japan. His awards include the Distinguished Service Medal and theLegion of Merit with Gold Star.

DEYO HISTORY

COAT OF ARMS



DEYO Coat of Arms

The divisions, colors and elements of the shield represent Vice Admiral Morton Lyndholm Deyo through his place of birth and naval career. The wavy bars simulate water and refer to the Indian came, "The reed covered lodge by the water place," for Poughkeepsie, New York, where he was born on 1 July 1887. Red, white and blue, our national colors, are also a common denominator, for it was in Poughkeepsie in July 1788 that the Constitution of the United States was ratified by the state of New York. The three stars and the colors of blue and gold represent his Navy tenure and the highest rank he achieved. The three stars also denote the three decorations awarded to Admiral Deyo: The Distinguished Service Medal (Navy) and the Legion of Merit with Gold Star. The arrowheads refers to his destroyer service during World War I and his support of assault landings in Europe and Asia during World War II. The arrowhead further allude to the awsome striking power and sophisticated weaponry of modern destroyers. The trident is emblematic of the seas, and with the glode, refers to Admiral Deyo's expierence in Naval strategy in peace and time of war. The fiery "U" commenorates Admiral Deyo's Force "U" during the amphibious invasion of the enemy-held coast in northern and southern France. "Brave and Proud," is the tradition of the name Deyo. It is the standard which was set by Vice Admiral Deyo as well as a call to those who serve on USS DEYO to meet or exceed those standards

COAT OF ARMS

COMMANDING OFFICER

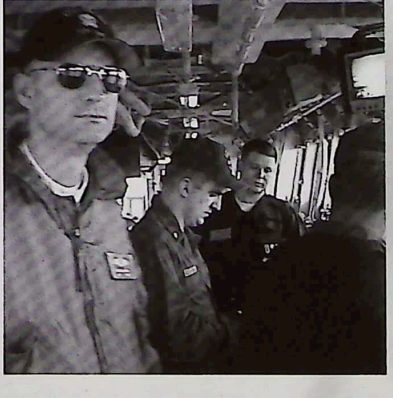
Commander Stephen W. Hampton is a native of Brooksfield, Wisconsin. He graduated for the U. S. Naval Academy with a Bachelors of Science degree in Mechanical Engineering in 1981 and was comissioned an Ensign in the U. S. Navy.

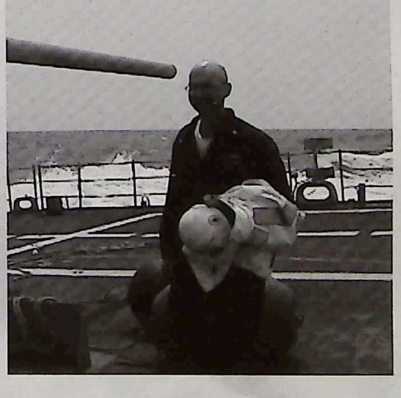
Following Basic Surface Warfare Officer School (SWOS), his sea duty assignments included tours in USS FORRESTAL (CV 59) as Propulsion (P-5) Division Officer in the Engineering Department and on USS Clark (FFG 11) as Combat Information Center Officer, as well as Communcations Officer. Attending the SWOS Department Head Course in 1988, he returneed to sea in USS John L. Hall (FFG 32) and USS Thomas S.Gates (CG 51) as the Operations Officer. His latest assignments were USS Conolly (DD 979) as the Executive Officer, and at DESTROYER SQUADRON TWENTY-SIX as Chief Staff Officer.

Ashore Commander Hampton earned a Masters of Science in Anti-Submarine Warfare (ASW) Technologies while attending the Naval Postgraduate School in Monterey California from 1985 to 1987. From 1992 through 1994, he served in the Office of Secretary of Defense, Program Analysis & Evaluation as a Cost Analyst and Assistant for Joint, Navy, and Surface Warfare programs. From 1997 through early 1999, he served on the staff of the Director, Warfare Requirements, U. S. Atlantic Fleet as a Combat Systems & C4I, Tomahawk, and ASW Requirements Action Officer. He is a proven ASW Sub-Specialist, with Operations Analysis subspecialty experience. At sea and ashore, his awards include the Defense Meritorious Service Medal with two gold stars, the Navy Commendation Medal with two gold star, as well as vaious service and campaign ribbons.

CDR STEPHEN W. HAMPTON

EXECUTIVE OFFICER





No officer onboard DEYO set a better example to follow than the Executive Officer. LCDR O'Neil offered inspired leadership and expertise to the officers and crew of DEYO at every chance.

LCDR ROBERT O'NEIL

COMMAND MASTER CHIEF

The most senior member in the enlisted community is the Command Master Chief. The Command Master Chief oversees the training and well being of all Enlisted Service members on USS Deyo.

MSCM(SW/AW) STAILEY

USS DEYO (DD 989) History

USS DEYO (DD 989), the first U. S. warship to bear the name, was built by Ingles Shipbuilding of Litton Industries, Pascagoula, Mississippi. Her keel was laid on October 14, 1977, and she was christened and launched on March 31, 1979, and commissioned March 22, 1980. Since commissioning, DEYO has played a major in operations in the Atlantic and Eastern Pacific Oceans, Caribbean and Mediterranean Seas, and the Persian Gulf. The ship's first major deployment was in May 1981, when DEYO was ordered to the Persian Gulf in response to rising tension in the Middle East. DEYO received the Navy Expeditionary Medal and the Sea Service Deployment Award for this deployment. USS DEYO deployed again to the Persian Gulf in May 1983, and was awarded the Navy Meritorious Unit Commendation. DEYO has been a active player in numerous JCS Special Operations in Caribbean Sea and Eastern Pacific, where she received a second Navy Meritorious Unit Commendation. In October 1984, DEYO participated in Operation Wagonwheel, a joint Navy/Coast Guard drug interdiction operation where DEYO earned the Coast Guard Meritorious Unit Commendation. In March 1985 DEYO earned the covetted Battle "E" as top destroyer in Destoyer Squadron Six. Earlier that year, she under went her first regular overhaul for fifteen months in Portland, Maine, where she was fitted with a series of new weapons, including the Tomahawk Cruise Missile System. Following overhaul, DEYO returned to her homeport of Charleston, South Carolina, in May 1986. In July 1987, Deyo deployed with the USS IOWA Battleship Battle Group to the Meditteranian, North Arabian Sea, and the Indian Ocean, where she earned her first Armed Forced Expedtionary Medal. USS DEYO deployed once again in July 1989 to the Persian Gulf, where she participated in tanker escort duties as part of Operation Earnest Will, earning her second Armed Forces Expeditionary Medal. In August 1990, DEYO conducted counter/drug operations in the Caribbean for which she was awarded the Joint Meritorious Unit Award. In December 1990, DEYO prepared for deployment in March 1991 with USS FORRESTAL, in support of Operation Desert Storm. When Persian Gulf hostilities ended, DEYO's deployment was delayed until May 30, 1991, as part of the Med 3-91 Carrier Battle Group with USS FORRESTAL. During Med 3-91, DEYO operated with FORRESTAL in the Eastern Mediterranian in support the Kurdish relief effort, Operation Provide Comfort, for which DEYO was awarded the Southwest Asia Service Medal. Other operations include the large scale NATO exercise "Display Determination 91" and several smaller exercises. In December 1991, DEYO escorted the Soviet aircraft carrier KUZNETSOV as it transited through the Mediterranian on her way to the Northern Fleet. DEYO returned from deployment on December 21, 1991. DEYO participated in three counter-narcotic operations in the Caribbean and Eastern Pacific during 1992, and as a result, earned a second Joint Meritorious Unit Award. During Med 2-94, DEYO deployed with the George Washington Carrier Battle Group, under the command of Cruiser/Destroyer Group Two. While deployed she supported NATO operation "Sharp Guard" in the Adriatic Sea, earning the Navy Meritorious Unit Commendation. DEYO went on the earn her second Battle "E" as top destroyer in Destoyer Squadron Four. In February 1995, Deyo once again transited the Atlantic, this time to support exercise "Strong Resolve", a multinational amphibious exercise in the Fjords of Norway. For five days, DEYO hosted thousands of Oslo natives onboard. In May 1995, DEYO supported submarine prospective Commanding Officer operations. On May 22, 1995 DEYO was welcomed to Norfolk, Virginia, her new homeport. DEYO concluded her underway time for 1995, prior to entering regular overhaul, conducting counter-drug operations in the Caribbean Sea and Eastern Pacific Ocean. In September 1995, DEYO entered the shipyard at Newport News Shipbuilding and Drydock Company for a thirteen month regular overhaul. During the overhaul, DEYO received the vertical launching system and SQQ-89 Sonar Suite upgrade, making her a greater strike and USW capable platform. After completing the overhaul in November 1996, DEYO commensed preparation the 1998 deployment. DEYO deployed for the Mediterranian Sea in June 10, 1998, becoming the first American ship to serve as the flagship for Standing NATO Force Mediterranian, under Rear Admiral David M. Stone. Beginning in January 1999 DEYO commensed preparations for a second Standing NATO Force Mediterranian deployment, where she participated in the multinational USW warfare exercise "Dogfish".

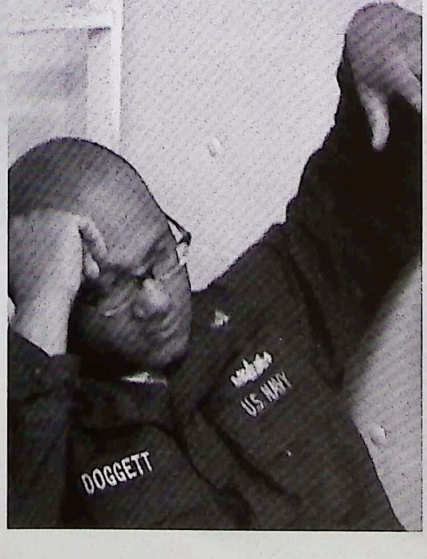
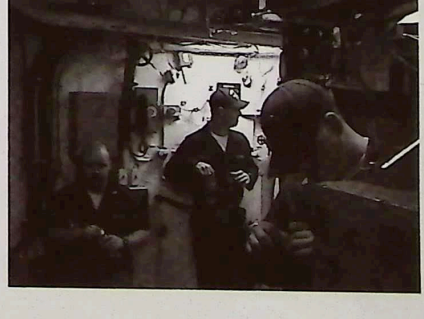
FACTOID: On the journey across the Atlantic Sonarmen actually heard what was believed to be torpedos in the water causing the crew to go to battle station. It turned out to another ship in the vacinity with engine problems. During NATO Exercise "Dogfish" CA Division performed their duties with exemplary fashion, resulting in multiple identifications and simulated kills.





CF DIVISION

CF Division is composed of Firecontrolmen that maintain and operate the highly sophisticated gun and missile systems onboard. The two work centers of Phalanx CIWS and TAS/NSSMS worked closely together as part of USS DEYO's primary air defense capability.

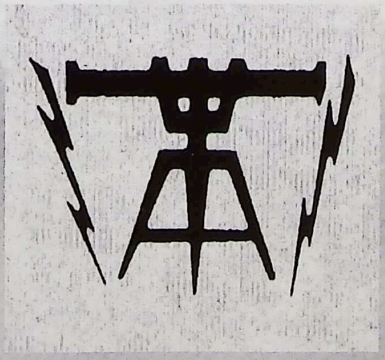
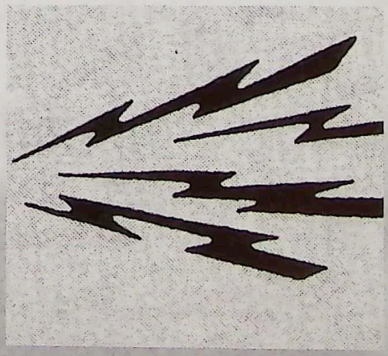
SYSTEMS
DEPARTMENT

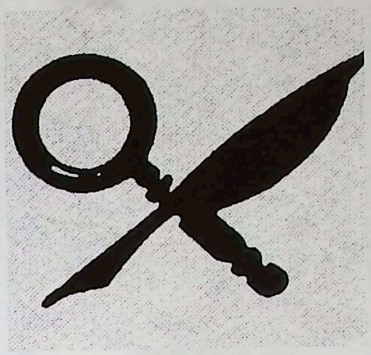


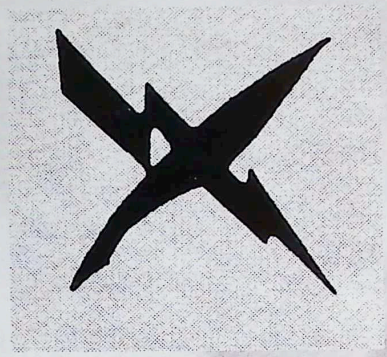


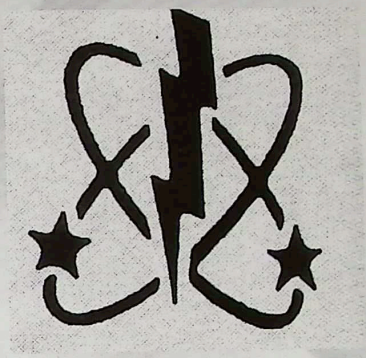
OPERATIONS DEPARTMENT

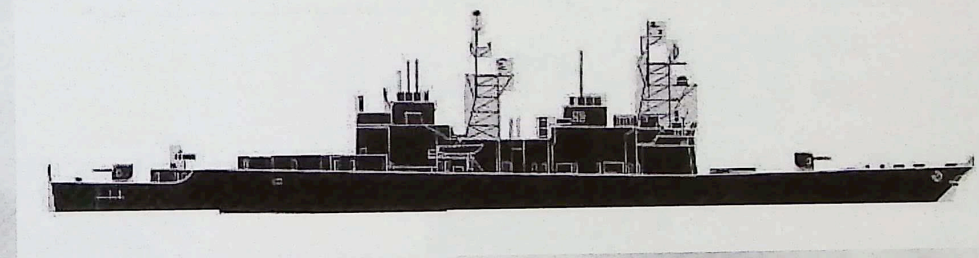
The Boss
LT Bailey

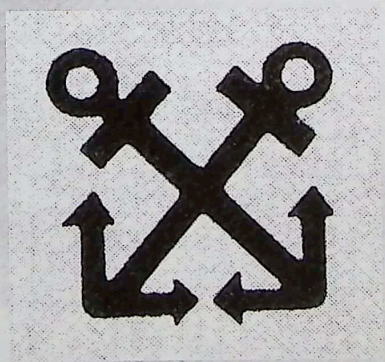
The Operations Department on DEYO has a wide range of skills and rates associated with it. Ops Department plays a part in every major shipboard operation. OPS members are responsible for fueling the ship, guiding her safely, gathering intellgence, and ensuring good communcations and communication security.

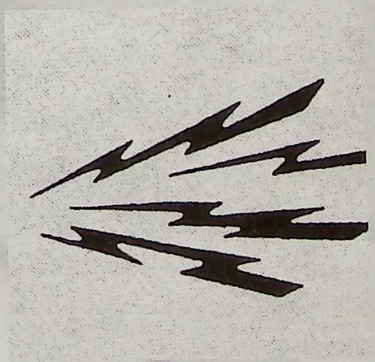


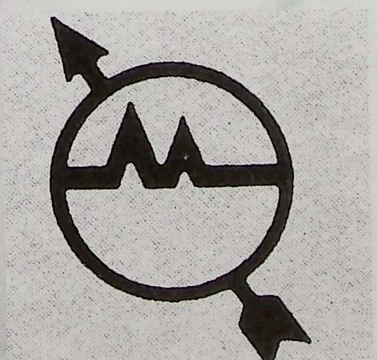












OD DIVISION

Truely the backbone of the Navy, Deck Division is comprised of Boatswains Mates and Deck Seaman. OD division is tasked with the never ending and all too important job of preserving the ship's exterior. While at sea, Deck is responsible for steering the ship and keeping a sharp lookout as DEYO travels throughout the night on the open oceans. Deck Division's duties also include small boat evolutions, helo operations, anchoring, and Underway Replenishment.

More on Deck Division's adventures in the coming "Underway Replenishment section.

OC DIVISION

One of the most important divisions in OPS Department is OC. This division takes care of business in the workspace known as Radio. Radio is the primary home of communications onboard DEYO. The team of ITs are dedicated to keeping quality communications onboard DEYO and worked tirelessly to do so. Leading the charge are ENS Walters, the Communications Officer / CMS Custodian and the dynamic duo of ITC(SW) Markely as the LCPO and IT1(SS)Cook as the LPO. Although undermanned this Med Cruise, the "ITmen" of Radio have more than held their own and met all challenges head on.

DEYO is also involved with a little cloak and dagger. OT Division, better known as "Outboard"is DEYO's intellegence gather machine.

ENGINEERING DEPARTMENT

Engineering is the foundations of all DEYO operations. There would be no sailing of the seas without the propulsion systems maintained by the engineers. There would be no comforts like AC, TV, or lights without the ships generators, also maintained by the Engineers. Most importantly, DEYO could not defend herself properly with stable power and propulsion provided and maintained by the engineers.

DIVTACS

An important aspect of working with NATO units is the ability to maneuver at close quarters. Ships from several countries maneuver their vessels to within a few hundred yards and conduct a series of maneuvering drills to gage the crew's ability to decipher coded maneuvering instructions. Deyo and Epirus often engaged in these exercises.

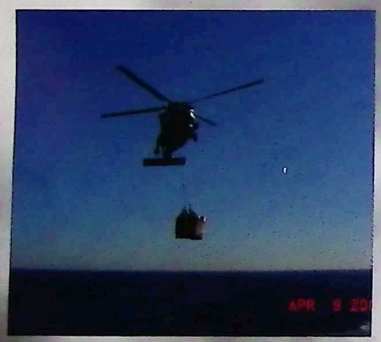
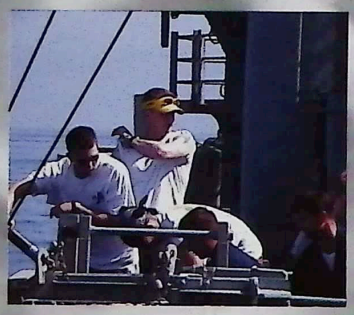
UNDERWAY REPLENISHMENT
VERTICAL REPLENISHMENT

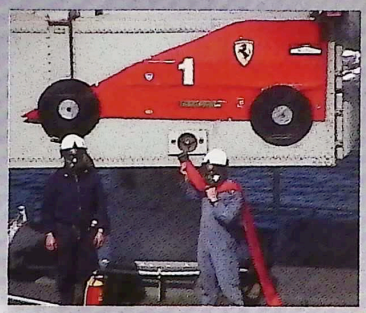


Underway Replenishment

Among the most common evolutions onboard was Replenishment at Sea. DEYO participated in 35 replenishments at sea. Many times the crew manned up cargo and refueling stations, taking on both at the same time. During some unreps, the helicopter was used for vertical replenishment, onloading stores and ammunition. DEYO received over four million gallons of fuel during Underway Replenishments.

SAIL PAST





One tradition in Standing NATO Force Mediterranean is the Sail Past. Those units at the end of their NATO duties are honored with a parade of ships. All participating units dress their ships in various decorations and show that, differences aside, we all occasionally want to have a little fun. Dancing, high pressure water fights, and mayhem ensue.
